

MY AUDIOMETER NEEDS REPAIRS & RECALIBRATION, WHAT DO I DO?

Find a box that will fit your unit and accessories. Make sure your unit and accessories are packed with packing material, to ensure your unit won't be damaged in shipping. Remember to insure your audiometer.

Remember the audiometer **AND HEADSET** are required to perform your recalibration. Fill out the following form and send it in with your audiometer.

Rentals are available if you can't be without an audiometer. Normally we have "**2-3 days or less in shop**" turn around, so the majority of the time that your unit will be gone will be due to shipping. We assume you want all broken parts and out of spec's problems repaired. If you need us to call you with an estimate before repairing the unit please specify.

How you send it is how you'll get it back
Overnight = Overnight Ground = Ground

AMBCO charges for the return shipping and for the calibration so include a PO# if needed

PHONE # (714) 259-7930 (714) 259-1688 fax

Fill out and return this page with your unit
